

Rapid Response  
Modification Center  
**Fast. Focused. Ready.**

# Built for speed and customer need

Achieve complete acquisition and execution of modifications and repairs in a fraction of the typical time—done right by a fast, focused, and ready Boeing team.

## Rapid Response to customer needs

### Readiness improved for customers

- Dedicated to meeting each customer's urgent operational needs
- Capable of certifying installations to FAA and DoD customer requirements
- Licensed FAA repair, set up for classified work

### Agile, streamlined operations

- Work completed in a fraction of the typical time
- Submittal of proposals in 5 to 13 days, not weeks or months

### People who are empowered and experienced

- Experienced and skilled workforce
- Highly skilled team has experience having modified more than 2,000 aircraft

### Innovative solutions

- Intelligence backed by data analytics
- Solutions based on experience, training, and technology

### Dedicated spaces and resources

- 59,000-square-foot dedicated hangar space (fits a 747-8 or C-5 Galaxy)
- 11,500-foot-long runway with 24/7 fire and crash service
- On-site collaboration facility for rapid team decisions

## The team

- Dedicated Rapid Response team has a focus-and-finish mindset
- All highly trained disciplines are co-located
- Mechanics are experienced and innovative problem solvers
- Team has access to broad Boeing resources, including data analytics
- Authority is streamlined to cut process flow into a fraction of typical time
- Processes are simplified for faster turnaround
